Fund Change Information

On Sept. 19, 2011, the name of the BLDRS Europe 100 ADR Index Fund changed to the BLDRS Europe Select ADR Index Fund.

Fund Description

The BLDRS Europe Select ADR Index Fund is based on the BNY Mellon Europe Select ADR Index, which is a capitalization-weighted index designed to track the performance of approximately 100 European market-based depositary receipts. The Fund normally holds at least 95% of its total assets in depositary receipts that comprise the Index. The portfolio is rebalanced and reconstituted quarterly.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index.

Data beginning Nov. 30, 2002, the month end following Fund inception and ending March 31, 2012.

Fund Performance & Index History (%)

	1 Year	3 Year	5 Year	10 Year	Fund Inception
Underlying Index					
BNY Mellon Europe Select ADR Index	-6.41	16.69	-3.65	-	7.28
Benchmark Indexes					
MSCI Europe Index	-7.54	17.58	-3.99	5.43	8.19
MSCI EAFE Index	-5.77	17.13	-3.51	5.65	8.26
S&P 500 Index	8.51	23.40	2.01	4.12	7.23
Fund					
NAV	-6.47	16.50	-3.77	-	6.99
After Tax Held	-7.65	15.06	-5.12	-	5.76
After Tax Sold	-4.25	13.43	-3.80	-	5.47
Market Price	-6.51	16.52	-3.80	-	6.95

Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

5-Year Index Statistics

	Alpha	Beta	Correlation	Sharpe Ratio	Volatility (%)
BNY Mellon Europe Select ADR Index	-	-	-	-0.19	24.87
MSCI Europe Index	0.21	0.97	0.99	-0.20	25.19
MSCI EAFE Index	0.44	1.07	0.98	-0.20	22.87
S&P 500 Index	-4.88	1.20	0.92	0.05	19.07

Alpha, beta and correlation are relative to underlying index.

Fund Inception: Nov. 13, 2002

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might

have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The MSCI EAFE® Index is an unmanaged index considered representative of stocks of Europe, Australasia and the Far East.

The MSCI Europe Index is an unmanaged index considered representative of stocks of developed European countries.

The S&P 500® Index is an unmanaged index considered representative of the U.S. stock market.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

About risk

Foreign securities have additional risks, including exchange-rate changes, decreased market liquidity, political instability and taxation by foreign governments.

Investing in securities of small and medium-sized companies may involve greater risk than is customarily associated with investing in large companies.

The **Intraday NAV** is a symbol representing estimated fair value based on the most recent intraday price of underlying assets. **Volatility** is the annualized standard deviation of index returns. **Beta** is a measure of relative risk and the slope of regression. **Sharpe Ratio** is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance. **Correlation** indicates the degree to which two investments have historically moved in the same direction and magnitude. **Alpha** is a measure of performance on a risk-adjusted basis. **Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio)** is the share price divided by earnings per share. It is measured on a 12-month trailing basis. **Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio)** is the ratio of a stock's market price to a company's net asset value. **Weighted Harmonic Average** is a method of

calculating an average value that lessens the impact of large outliers and increases the impact of small ones. **Weighted Average Return on Equity** is net income divided by net worth. **Weighted Market Capitalization** is the sum of each underlying securities' market value.

Security classifications used in calculating allocation tables are as of Feb. 29, 2012.

The Global Industry Classification Standard was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

BNY Mellon's methodology rules regarding liquidity and price for inclusion in the indices (through which the Funds seek to provide investment results that correspond generally, before fees and expenses, to the price and yield performance of the relevant BNY Mellon ADR index) have changed. Previously, any index security of the ADR Index that had (one) a price greater than or equal to \$3.00, (two) a minimum three month average daily Depositary Receipt trading volume greater than or equal to 25,000 shares or 125,000 ordinary shares in the local market, and (three) free-float adjusted market capitalization greater than or equal to \$250 million would have been eligible for inclusion into BNY Mellon ADR Indices. Currently, there is no minimum price for inclusion. Additionally a three month average daily US dollar (USD) volume of \$100,000 in the primary ADR market and a three month average daily USD volume of \$1,000,000 in combined global markets replace the prior liquidity

criteria. The free-float adjusted market capitalization threshold remains the same.
