

PGJ

As of June 30, 2010

Fund Description

The PowerShares Golden Dragon Halter USX China Portfolio is based on the Halter USX China IndexSM. The Fund will normally invest at least 90% of its total assets in equity securities that comprise the Index. The Index is composed of U.S.-listed securities of companies that derive a majority of their revenue from the People's Republic of China. The Index is designed to provide insight and access to the unique economic opportunities taking place in China while still providing investors with the transparency³ offered with U.S.-listed securities. The portfolio is reconstituted and rebalanced quarterly.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. Foreign investments involve greater risks than domestic investments.

Performance data quoted represents past performance. As stated in the Fund's prospectus, the gross annual fund operating expense ratio is 0.71%. However, the Adviser has contractually agreed to waive fees and/or pay certain Fund expenses which resulted in a lower fee actually paid by investors. The expenses borne by the Adviser are subject to recapture by the Adviser for up to three years from the date the fee or expense was borne by the Adviser. These waivers and reimbursement contracts extend through at least Aug. 30, 2010. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. The Shares' performance reflects fee waivers, absent which performance would have been lower. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

5-Year Index Statistics^{1,3}

	Performance (%)	Volatility (%)	Sharpe Ratio
Halter USX China	12.69	32.53	0.31
MSCI China	20.98	32.91	0.56
FTSE/Xinhua China 25	15.75	32.27	0.41
S&P 500	-0.79	16.81	-0.19

securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The MSCI China Index, the FTSE/Xinhua China 25 Index and the S&P 500[®] Index are unmanaged indexes considered representative of Chinese stocks, Chinese blue chip stocks and the U.S. stock market, respectively.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

Leading the Intelligent ETF Revolution[®]

Underlying Index performance does not represent Fund performance.

³ ETFs offer transparency, meaning they disclose their full portfolio holdings daily.

The Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Volatility is the annualized standard deviation of index returns.

Beta is a measure of relative risk and the slope of regression.

Sharpe Ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance.

Correlation indicates the degree to which two investments have historically moved in the same direction and magnitude.

Alpha is a measure of performance on a risk-adjusted basis.

Stock Price-to-Earnings Ratio is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Stock Price-to-Book-Value Ratio is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities' market value.

⁴ Please see the website for complete holdings information. Holdings are subject to change.

⁵ The weighted costs excluded from the expense cap include: legal fees pertaining to the Fund's shares offered for sale, SEC and state registration fees, initial fees paid to be listed on an exchange and sublicensing fees. The expense cap is not representative of the total expenses the investor may pay. Please refer to the prospectus for a complete fee schedule.

The Fund may contain securities in the technology and energy industries. Companies engaged in these industries are subject to greater risks, and are more greatly impacted by market volatility, than more diversified investments.

Investing in securities of small and medium-sized companies may involve greater risk than is customarily associated with investing in large companies.

The Fund is considered non-diversified and may be subject to greater risks than a diversified fund.

The value of the securities of companies which derive the majority of their revenues from China is likely to be more volatile than that of other issuers. The Fund is subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in security prices. Overall

security values could decline generally or could underperform other investments.
