As of June 30, 2010

Fund Description

The PowerShares DWA Emerging Markets Technical Leaders Portfolio is based on the Dorsey Wright® Emerging Markets Technical Leaders Index. The Fund will normally invest at least 80% of its total assets in securities of emerging economies within Dorsey Wright & Associates' classification definition, excluding companies listed on a U.S. stock exchange. This Index includes approximately 100 companies that possess powerful relative strength characteristics and are domiciled in emerging market countries (excluding the United States), including, but not limited to Argentina, Brazil, Chile, China, Colombia, Czech Republic, Egypt, Hungary, India, Indonesia, Israel, Malaysia, Mexico, Morocco, Pakistan, Peru, Philippines, Poland, Russia, South Africa, Taiwan, Thailand and Turkey. The Index is reconstituted and rebalanced quarterly.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. There are additional risks associated with an investment in emerging market countries. Ordinary brokerage commissions apply.

Performance data quoted represents past performance. As stated in the Fund's prospectus, the expense ratio of 0.90% is expressed as a unitary fee to cover expenses incurred in connection with managing the portfolio. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. The Shares' performance reflects fee waivers, absent which performance would have been lower. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

1-Year Index Statistics^{1,3}

	Performance (%)	Volatility (%)	Sharpe Ratio
DWA Emerging Markets Technical Leaders	33.46	23.27	1.36
MSCI Emerging Markets	23.15	21.01	1.05
MSCI Emerging Markets Growth	22.57	20.88	0.94
S&P 500	14.43	18.69	0.70

shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The MSCI Emerging Markets Index, the MSCI Emerging Markets Growth Index and the S&P 500® Index are unmanaged indexes considered representative of stocks of developing countries, growth stocks of developing countries, and the U.S. stock market, respectively.

Shares are not FDIC insured, may lose value and have no bank guarantee.

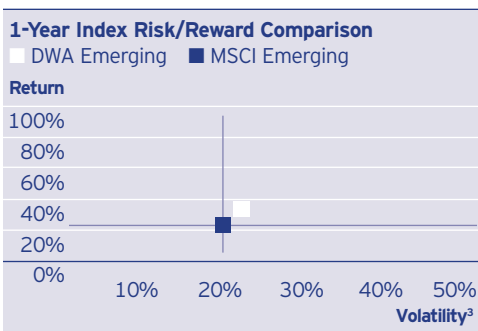

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

Leading the Intelligent ETF Revolution®

Underlying Index performance does not represent Fund performance.

³ The Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Volatility is the annualized standard deviation of index returns.

Beta is a measure of relative risk and the slope of regression.

Sharpe Ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance.

Correlation indicates the degree to which two investments have historically moved in the same direction and magnitude.

Alpha is a measure of performance on a risk-adjusted basis.

Stock Price-to-Earnings Ratio is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Stock Price-to-Book-Value Ratio is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average is a method of calculating an average value that lessens the

impact of large outliers and increases the impact of small ones.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities' market value.

⁴ Please see the website for complete holdings information. Holdings are subject to change.

Foreign securities have additional risks, including exchange-rate changes, decreased market liquidity, political instability and taxation by foreign governments.

Investment in securities in emerging market countries involves risks not associated with investments in securities in developed countries.

The Fund may contain securities in the basic materials and financial services sectors. Companies engaged in these sectors are subject to greater risks, and are more greatly impacted by market volatility, than more diversified investments.
