

POWERSHARES EXCHANGE-TRADED FUND TRUST II
SUPPLEMENT DATED DECEMBER 1, 2008 TO THE PROSPECTUS
DATED APRIL 1, 2008 OF:

PowerShares Global Nuclear Energy Portfolio (the "Fund")

The fifth paragraph of the section titled "Management of the Fund" is hereby removed and replaced with the following:

John W. Southard, Jr., CFA, MBA, oversees all research, portfolio management and trading operations of the Funds. In this capacity, Mr. Southard oversees a team of portfolio managers (with Mr. Southard, the "Portfolio Managers") who are responsible for the day-to-day management of each Fund. Peter Hubbard, who reports to Mr. Southard, is the member of the portfolio management team who is currently primarily responsible for each Fund's day-to-day management. Mr. Hubbard receives management assistance from Joshua Betts, Brian McGreal and Travis Trampe, who perform various functions related to portfolio management, including investing cash flows, coordinating with other team members to focus on certain asset classes, implementing investment strategy and researching and reviewing investment strategy. Each member of the portfolio management team has appropriate limitations on his authority for risk management and compliance purposes.

The following paragraph is hereby added after the second paragraph of the section titled "Management of the Fund—Portfolio Managers":

Joshua Betts is a Vice President and Portfolio Manager of the Adviser and has been one of the Portfolio Managers primarily responsible for the day-to-day management of the Fund since November 2008. Prior to joining the Adviser, Mr. Betts was a Regional Vice President at Claymore Securities, Inc., from 2007 to 2008. Prior to this, he was a Portfolio Consultant for the Adviser from 2006 to 2007. From 2005 to 2006, he was a mortgage broker for Advanced Mortgage Services. He received a Bachelor of Science from Oregon State University.

**POWERSHARES EXCHANGE-TRADED FUND TRUST II
(the “Trust”)**

**Supplement Dated August 21, 2008 to the Prospectus
Dated April 1, 2008 of:**

PowerShares Global Nuclear Energy Portfolio (the “Fund”)

Rudolf Reitmann has taken an operational role with the Trust and is no longer responsible for the day-to-day management of the Fund. Therefore, all references relating to Rudolf Reitmann are hereby removed.

Jason Stoneberg is no longer responsible for the day-to-day management of the Fund. Therefore, all references relating to Jason Stoneberg are hereby removed.

The fifth paragraph of the section titled “Management of the Fund” is hereby removed and replaced with the following:

John W. Southard, Jr., CFA, MBA, oversees all research, portfolio management and trading operations of the Fund. In this capacity, Mr. Southard oversees a team of portfolio managers (with Mr. Southard, the “Portfolio Managers”) who are responsible for the day-to-day management of the Fund. Peter Hubbard, who reports to Mr. Southard, is the member of the portfolio management team who is currently primarily responsible for the Fund’s day-to-day management. Mr. Hubbard receives management assistance from Brian McGreal and Travis Trampe, who perform various functions related to portfolio management, including investing cash flows, coordinating with other team members to focus on certain asset classes, implementing investment strategy and researching and reviewing investment strategy. Each member of the portfolio management team has appropriate limitations on his authority for risk management and compliance purposes.

The following paragraph is hereby added after the third paragraph of the section titled “Management of the Funds—Portfolio Managers”:

Brian McGreal is a Vice President and Portfolio Manager of the Adviser and has been one of the Portfolio Managers primarily responsible for the day-to-day management of the Fund since August 2008. Prior to joining the Adviser, Mr. McGreal was an analyst for Ritchie Capital Management from May 2005 to September 2007 and a trader with SAM Investments from February 1999 to April 2005.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.

PowerShares Global Nuclear Energy Portfolio – PKN

PowerShares Exchange-Traded Fund Trust II (the “Trust”) is a registered investment company that currently consists of 29 separate exchange-traded index funds. Additional funds may be offered in the future. This Prospectus relates to the PowerShares Global Nuclear Portfolio (the “Fund”).

The Fund’s shares (the “Shares”) have been approved for listing on the NYSE Arca, Inc. (“NYSE Arca”), subject to notice of issuance. The market prices for the Shares may be different from their net asset value (“NAV”). The Fund will issue and redeem Shares only in large blocks consisting of 100,000 Shares (“Creation Units”). Creation Units are issued and redeemed principally in-kind for securities included in a specified index.

Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

The Securities and Exchange Commission (“SEC”) has not approved or disapproved these securities or passed upon the adequacy or accuracy of this Prospectus. Each representation to the contrary is a criminal offense.

Prospectus dated April 1, 2008

INTRODUCTION – POWERSHARES EXCHANGE-TRADED FUND TRUST II

The Trust is an investment company consisting of 29 separate exchange-traded “index funds.” The investment objective of each of the funds of the Trust is to replicate as closely as possible, before fees and expenses, the price and yield of a specified market index. This Prospectus relates to the PowerShares Global Nuclear Portfolio. Invesco PowerShares Capital Management LLC (the “Adviser”) is the investment adviser for the Fund.

Shares of the PowerShares Global Nuclear Energy Portfolio have been approved for listing on the NYSE Arca, subject to notice of issuance. The market prices for the Shares may be different from their NAV. Unlike conventional mutual funds, the Fund issues and redeems Shares on a continuous basis, at NAV, only in large specified blocks, each called a “Creation Unit.” Creation Units are issued and redeemed principally in-kind for securities included in the underlying index. Except when aggregated in Creation Units, Shares of the Fund are not redeemable securities of the Fund.

WHO SHOULD INVEST IN THE FUND

The Fund is designed for investors who seek a relatively low-cost approach for investing in a portfolio of equity securities of companies in a specified index. The Fund may be suitable for long-term investment in the market represented in the underlying index and may also be used as an asset allocation tool or as a speculative trading instrument.

TAX ADVANTAGED PRODUCT STRUCTURE

Unlike interests in conventional mutual funds, the Shares are traded throughout the day on a national securities exchange, whereas mutual fund interests are typically only bought and sold at closing NAVs. The Shares have been designed to be tradable in the secondary market on a national securities exchange on an intraday basis, and to be created and redeemed, principally in-kind, in Creation Units at the day’s next calculated NAV. These arrangements are designed to protect ongoing shareholders from the adverse effects on the portfolio of the Fund that could arise from frequent cash creation and redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders because of the mutual fund’s need to sell portfolio securities to obtain cash to meet fund redemptions. These sales may generate taxable gains for the shareholders of the mutual fund, whereas the Shares’ in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

The Fund may invest in derivatives, the use of which will generally result in the realization of short-term capital gains that will be classified as ordinary income for tax purposes when distributed to investors.

Powershares Global Nuclear Energy Portfolio

Investment Objective, Strategies and Risks

Investment Objective

The Fund seeks investment results that correspond (before fees and expenses) generally to the price and yield performance of the index called the WNA Nuclear Energy IndexSM (the “Underlying Index”).

Principal Investment Strategies

The Fund will normally invest at least 90% of its total assets in stocks and American depository receipts (“ADRs”) based on the securities that comprise the Underlying Index. The Fund anticipates that the majority of its investments will be in the securities that comprise the Underlying Index rather than in ADRs. The Adviser will seek to match the performance of the Underlying Index. The Fund will normally invest at least 80% of its total assets in the nuclear energy industry. The Underlying Index is designed to measure the overall performance of globally traded securities of companies which are materially engaged in the nuclear energy industry and is calculated and maintained by Standard & Poor’s Custom Indices on behalf of WNA Global Indexes, LLC (the “Index Provider”). As of March 7, 2008, the Underlying Index included 100 companies with a market capitalization range of between approximately \$288 million and approximately \$324 billion traded on recognized stock exchanges in a) the Americas, b) Europe, Middle East & Africa and c) Asia/Pacific. Of the 100 companies included in the Underlying Index, 74 were foreign issuers. The Fund’s investment objective and 80% investment policy are non-fundamental and require 60 days’ prior written notice to shareholders before they can be changed.

The Underlying Index is adjusted quarterly and the Fund, using an “indexing” investment approach, attempts to replicate, before fees and expenses, the performance of the Underlying Index. The Adviser seeks correlation over time of 0.95 or better between the Fund’s performance and the performance of the Underlying Index; a figure of 1.00 would represent perfect correlation. The Fund generally will invest in the securities comprising the Underlying Index in proportion to their weightings in the Underlying Index. However, under various circumstances, it may not be possible or practicable to purchase all of those securities in those weightings. In those circumstances, the Fund may purchase a sample of securities in the Underlying Index. There may also be instances in which the Adviser may choose to overweight another security in the Underlying Index, purchase securities not in the Underlying Index which the Adviser believes are appropriate to substitute for certain securities in the Underlying Index or utilize various combinations of other available investment techniques, in seeking to track the Underlying Index. The Fund may sell securities that are represented

in the Underlying Index in anticipation of their removal from the Underlying Index or purchase securities not represented in the Underlying Index in anticipation of their addition to the Underlying Index.

Index Methodology

The Underlying Index is designed to serve as a stock market benchmark for globally traded stocks of companies which are engaged in the nuclear energy industry. The Underlying Index employs a hybrid weighting methodology designed to assure accurate investment exposure across reactors, primary construction, utilities, technology, equipment and service providers and fuels, the five main business segments that together comprise the Underlying Index. The reactors sector includes publicly traded companies that provide nuclear reactors. The primary construction sector includes publicly traded companies that provide primary construction services involving the construction and maintenance of nuclear power facilities. The utilities sector includes companies whose principal business is the supply of electrical power to countries, national sub-divisions (e.g. states or provinces) and municipalities, which derive over 20% of the power they produce from nuclear sources. The technology, equipment and service providers sector includes companies for which the supply of technology, hardware and services to the nuclear power industry are material to their financial performance, including suppliers of component hardware and electronics, facility management services, nuclear waste disposal and treatment services and enabling technologies. The fuels sector includes companies principally engaged (more than 50% of total revenues) in the mining, processing and enrichment of uranium and/or recycling and reprocessing nuclear fuels.

The Underlying Index contains stocks selected from a universe of equity securities traded on recognized stock exchanges in a) the Americas, b) Europe, Middle East & Africa and c) Asia/Pacific, based on the Index Provider's proprietary methodology.

Index Construction

The Underlying Index is divided into five segments: i) the reactors segment which represents 15% of the total weight of the Underlying Index, ii) the primary construction sector which represents 15% of the total weight of the Underlying Index, iii) the utilities sector, which represents 25% of the total weight of the Underlying Index, iv) the technology, equipment and services sector which

represents 25% of the total weight of the Underlying Index and v) the fuels sector which represents 20% of the total weight of the Underlying Index.

The selection criteria for securities in the Underlying Index include requirements for industry participation, primary exchange listing, minimum capitalization (adjusted for free float), minimum price and minimum average daily trading volume.

Each security's relative weighting in the Underlying Index is determined based upon the sector of the Underlying Index to which the company is assigned. Each sector employs a separate weighting process:

- i) **Reactors.** Companies are equally weighted. In the case of joint ventures, the joint ventures' weight is divided between the partners in the joint venture.
- ii) **Primary Construction.** Companies are equally weighted.
- iii) **Technology, Equipment and Services.** Companies are capitalization weighted, adjusted for float. Individual company weights are capped at 3% of their weight in the Underlying Index.
- iv) **Utilities.** Companies are capitalization weighted, adjusted for float. Company weights are further adjusted to reflect the percentage of total power output derived from nuclear sources. Individual company weights are capped at 3% of their weight in the Underlying Index.
- v) **Fuels.** Companies are capitalization weighted, adjusted for float. Individual company weights are capped at 3% of their weight in the Underlying Index.

Rebalancing data, including constituent weights and related information, is posted on the Underlying Index's web site (www.wnanuclearindex.com) prior to the start of trading on the first business day following the third Friday of the calendar quarter. Share weights of the constituents remain constant between quarters except in the event of certain types of corporate actions, including stock splits and reverse stock splits. Share weights of the Underlying Index are not adjusted between rebalancing dates for shares issued or shares repurchased.

The Underlying Index began operations on September 11, 2007. Valuation Data regarding the Underlying Index is available via Bloomberg, L.P.

Principal Risks of Investing in the Fund

The following specific risk factors have been identified for the Fund. See also the section on “Additional Risks” for other risk factors.

Market Risk

The Shares are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Overall securities values could decline generally or could underperform other investments.

Market Trading Risk

Risk is inherent in all investing. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange. You should anticipate that the value of the Shares will decline, more or less, in correlation with any decline in value of the Underlying Index.

Non-Correlation Risk

The Fund’s return may not match the return of the Underlying Index for a number of reasons. For example, the Fund incurs operating expenses not applicable to the Underlying Index, and incurs costs in buying and selling securities, especially when rebalancing the Fund’s securities holdings to reflect changes in the composition of the Underlying Index. In addition, the performance of the Fund and the Underlying Index may vary due to asset valuation differences and differences between the Fund’s portfolio and the Underlying Index resulting from legal restrictions.

Due to legal and regulatory rules and limitations imposed by certain countries in which securities in the Underlying Index trade, the Fund may not be able to invest in all securities included in the Underlying Index. The Fund may exclude certain securities included in the Underlying Index that are traded in certain countries due to issues such as trading restrictions, cost or liquidity constraints. Since the Underlying Index is not subject to the diversification requirements to which the Fund must adhere, the Fund may be required to deviate its investments from the securities and relative weightings of the Underlying Index. The Fund may not invest in certain securities included in the Underlying Index due to liquidity constraints. Liquidity constraints may delay the Fund’s purchase or sale of securities included in the Underlying Index. For tax efficiency purposes, the Fund may sell certain securities to realize losses, causing it to deviate from the Underlying Index.

The Fund may not be fully invested at times, either as a result of cash flows into the Fund or reserves of cash held by the Fund to meet redemptions and expenses. If the Fund utilizes a sampling approach or futures or other derivative positions, its return may not correlate as well with the return of Underlying Index as would be the case if it purchased all of the securities in the Underlying Index with the same weightings as the Underlying Index.

Replication Management Risk

Unlike many investment companies, the Fund is not “actively” managed. Therefore, it would not necessarily sell a security because the security’s issuer was in financial trouble unless that security is removed from the Underlying Index.

Small and Medium Capitalization Company Risk

Investing in securities of small and medium capitalization companies involves greater risk than is customarily associated with investing in larger, more established companies. These companies’ securities may be more volatile and less liquid than those of more established companies. These securities may have returns that vary, sometimes significantly, from the overall securities market. Often small and medium capitalization companies and the industries in which they are focused are still evolving and this may make them more sensitive to changing market conditions.

Foreign Investment Risk

Investments in the securities of non-U.S. issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional costs, taxation by foreign governments, decreased market liquidity and political instability. As the Fund will invest in securities denominated in foreign currencies, changes in currency exchange rates may negatively impact the Fund’s returns. The values of the currencies of the countries in which the Fund may invest may be subject to a high degree of fluctuation due to changes in interest rates, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. Therefore, the Fund’s exposure to foreign currencies may result in reduced returns to the Fund. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting

and record keeping than are U.S. securities, and therefore, not all material information regarding these issuers will be available. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact the Fund's ability to invest in foreign securities or may prevent the Fund from repatriating its investments. In addition, the Fund may not receive shareholder communications or be permitted to vote the securities that it holds, as the issuers may be under no legal obligation to distribute them.

Nuclear Energy Risk

The energy industry can be significantly affected by obsolescence of existing technology, short product cycles, falling prices and profits, competition from new market entrants and general economic conditions. Further, the energy industry can be significantly affected by intense competition and legislation resulting in more strict government regulations and enforcement policies and specific expenditures for cleanup efforts, and can be subject to risks associated with hazardous materials. The nuclear energy industry can be significantly affected by fluctuations in energy prices and supply and demand of alternative energy fuels, energy conservation, the success of exploration projects and tax and other government regulations. The industry also can be significantly affected by the supply of and demand for specific products or services, the supply of and demand for oil and gas, the price of oil and gas, production spending, government regulation, world events and economic conditions.

Securities of the companies involved in this industry have been significantly more volatile than securities of companies operating in other more established industries. Certain valuation methods currently used to value companies involved in the nuclear power and power technology sectors, particularly those companies that have not yet traded profitably, have not been in widespread use for a significant period of time. As a result, the use of these valuation methods may serve to increase further the volatility of certain alternative power and power technology company share prices.

The nuclear energy companies in which the Fund invests are subject to risks of lengthy delays, greatly increased costs and other problems associated with the design, construction, licensing, regulation and operation of nuclear facilities for electric generation, including, among other considerations, the problems associated with the use of radioactive materials and the disposal of radioactive wastes. There are substantial differences among the regulatory practices and

policies of various jurisdictions, and any given regulatory agency may make major shifts in policy from time to time. There is no assurance that regulatory authorities will, in the future, grant rate increases or that such increases will be adequate to permit the payment of dividends on common stocks issued by a utility company. Additionally, existing and possible future regulatory legislation may make it even more difficult for utilities to obtain adequate relief. In addition, governmental authorities may from time to time review existing policies and impose additional requirements governing the licensing, construction and operation of nuclear power plants.

The price of crude oil, natural gas, electricity produced from traditional hydro power and possibly other undiscovered energy sources could potentially have a negative impact on the competitiveness of nuclear energies.

Non-Diversified Fund Risk

The Fund is considered non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a diversified fund.

The Fund's Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the FDIC or any other government agency.

How the Fund Has Performed

The Fund had not yet commenced operations as of the date of this Prospectus and therefore does not have a performance history for a full calendar year.

What are the Costs of Investing?

This table describes the fees and expenses that you may pay if you buy and hold Shares of the Fund. Investors purchasing Shares in the secondary market will not pay the Creation/Redemption Transaction Fees shown below, but may be subject to costs (including customary brokerage commissions) charged by their broker.(1)

Shareholder Transaction Expenses (fees paid directly from your investments)	None*
Standard Creation/Redemption Transaction Fee	\$.750†
Maximum Creation/Redemption Transaction Fee(2)	\$.3,000†

Annual Fund Operating Expenses ⁽³⁾ (expenses that are deducted from the Fund's assets)	
Management Fees	0.75%
Other Expenses ⁽⁴⁾	0.00%
Total Annual Fund Operating Expenses	0.75%

Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's gross operating expenses remain the same. Although your actual costs may be higher or lower, your costs, based on these assumptions, would be:

<u>1 YEAR</u>	<u>3 YEARS</u>
\$77	\$240

- (1) *The Fund had not commenced operations as of the date of this Prospectus. The expenses listed in the table are estimates based on the expenses the Fund expects to incur for the fiscal year ending October 31, 2008.*
- (2) *If a Creation Unit is purchased or redeemed outside the usual process through the National Securities Clearing Corporation ("NSCC"), if any, or for cash, a variable fee of up to four times the standard creation or redemption transaction fee will be charged.*
- (3) *Expressed as a percentage of average net assets.*
- (4) *The Trust's Investment Advisory Agreement provides that the Adviser will pay all expenses of the Fund, except for the fee payments under the Investment Advisory Agreement, distribution fees, if any, brokerage expenses, taxes, interest, litigation expenses and other extraordinary expenses.*
- † *Paid by Authorized Participants that purchase or redeem Shares in Creation Units only.*
- * *See "Creation Transaction Fees and Redemption Transaction Fees" below.*

Creation Transaction Fees and Redemption Transaction Fees

The Fund issues and redeems Shares at NAV only in large blocks of 100,000 Shares (each block of 100,000 Shares called a "Creation Unit") or multiples thereof. As a practical matter, only broker-dealers or large institutional investors with creation and redemption agreements and called authorized participants ("Authorized Participants," or "APs") can purchase or redeem these Creation Units. Purchasers of Creation Units at NAV must pay a standard Creation

Transaction Fee of \$750 per transaction (regardless of the number of Creation Units involved). An AP who holds Creation Units and wishes to redeem at NAV would also pay a standard Redemption Transaction Fee of \$750 for each redemption transaction (regardless of the number of Creation Units involved).^{*} APs who hold Creation Units in inventory will also pay the Annual Fund Operating Expenses described in the table above. Assuming an investment in a Creation Unit of \$2,500,000 and a 5% return each year, and assuming that the Fund's operating expenses remain the same, the total costs would be \$20,648 if the Creation Unit is redeemed after one year, and \$61,421 if the Creation Unit is redeemed after three years.

If a Creation Unit is purchased or redeemed outside the usual process through the NSCC, if any, or for cash, a variable fee of up to four times the standard Creation or Redemption Transaction Fee may be charged to the AP making the transaction.

The Creation Transaction Fee, Redemption Fee and variable fee are not expenses of the Fund and do not impact the Fund's expense ratio.

^{*} See "Creations, Redemptions and Transaction Fees" later in this Prospectus.

Additional Investment Strategies

The Fund will normally invest at least 90% of its total assets in component securities that comprise the Underlying Index and in ADRs based on such component securities. The Fund may invest its remaining assets in money market instruments, including repurchase agreements or other funds which invest exclusively in money market instruments (subject to applicable limitations under the Investment Company Act of 1940, as amended (the “1940 Act”), or exemptions therefrom), convertible securities, structured notes (notes on which the amount of principal repayment and interest payments are based on the movement of one or more specified factors, such as the movement of a particular security or securities index), and in swaps, options and futures contracts. Swaps, options and futures contracts (and convertible securities and structured notes) may be used by the Fund in seeking performance that corresponds to the Underlying Index and in managing cash flows. The Fund will not invest in forward currency contracts and money market instruments as part of a temporary defensive strategy to protect against potential securities market declines. The Adviser anticipates that it may take approximately three business days (i.e., each day the NYSE is open) for additions and deletions to the Fund’s Underlying Index to be reflected in the portfolio composition of the Fund.

Each of the policies described herein, including the investment objective of the Fund, constitutes a non-fundamental policy that may be changed by the Board of Trustees without shareholder approval. Certain fundamental policies of the Fund are set forth in the Fund’s Statement of Additional Information under “Investment Restrictions.”

Borrowing Money

The Fund may borrow money from a bank up to a limit of 10% of the value of its assets, but only for temporary or emergency purposes.

Securities Lending

The Fund may lend its portfolio securities. In connection with such loans, the Fund receives liquid collateral equal to at least 102% of the value of the portfolio securities being lent. This collateral is marked to market on a daily basis.

Additional Risks

Trading Issues

Trading in Shares on the NYSE Arca may be halted due to market conditions or for reasons that, in the view of the NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on the NYSE Arca is subject to

trading halts caused by extraordinary market volatility pursuant to the NYSE Arca “circuit breaker” rules. There can be no assurance that the requirements of the NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. Foreign exchanges may be open on days when Shares are not priced, and therefore, the value of the securities in the Fund’s portfolio may change on days when shareholders will not be able to purchase or sell Shares.

Fluctuation of Net Asset Value

The NAV of the Fund’s Shares will generally fluctuate with changes in the market value of the Fund’s holdings. The market prices of the Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for the Shares on the NYSE Arca. The Adviser cannot predict whether the Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for the Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Fund’s Underlying Index trading individually or in the aggregate at any point in time. However, given that the Shares can be purchased and redeemed in Creation Units (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), the Adviser believes that large discounts or premiums to the NAV of the Shares should not be sustained.

Securities Lending

Although the Fund will receive collateral in connection with all loans of its securities holdings, the Fund would be exposed to a risk of loss should a borrower default on its obligation to return the borrowed securities (e.g., the loaned securities may have appreciated beyond the value of the collateral held by the Fund). In addition, the Fund will bear the risk of loss of any cash collateral that it invests.

Swap Agreement Risk

The Fund may enter into swap agreements, including credit default swap agreements. Swap agreements are contracts between parties in which one party agrees to make periodic payments to the other party (the “Counterparty”) based on the change in market value or level of a specified rate, index or asset. In return, the Counterparty agrees to make periodic payments to the first party based on the return of a different specified rate, index or asset. Swap agreements will usually be done on a net basis, the Fund receiving or paying only the net

amount of the two payments. The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each swap is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Trust's custodian bank. The risk of loss with respect to swaps generally is limited to the net amount of payments that the Fund is contractually obligated to make. Swap agreements are also subject to the risk that the swap counterparty will default on its obligations. If such a default were to occur, the Fund will have contractual remedies pursuant to the agreements related to the transaction. However, such remedies may be subject to bankruptcy and insolvency laws which could affect the Fund's rights as a creditor (e.g., the Fund may not receive the net amount of payments that it contractually is entitled to receive).

The seller of a credit default swap contract is required to pay the par (or other agreed-upon) value of a referenced debt obligation to the purchaser in the event of a default by a third party, such as a U.S. or foreign corporate issuer, on the debt obligation. In return, the purchaser is required to pay the seller a periodic stream of payments over the term of the contract, provided that no event of default has occurred. If no default occurs, the seller would keep the stream of payments and would have no payment obligations. The seller is subject to investment exposure on the notional amount of the swap.

The purchase of a credit default swap incurs the risk that the investment may expire worthless and would generate income only in the event of an actual default by the issuer of the underlying obligation (as opposed to a credit downgrade or other indication of financial instability). It would also involve credit risk that the seller may fail to satisfy its payment obligations to the Fund in the event of a default.

The Fund will earmark or segregate assets in the form of cash and cash equivalents in an amount equal to the aggregate market value of the credit default swaps of which it is the seller, marked-to-market on a daily basis.

Portfolio Holdings

A description of the Trust's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information.

Management of the Fund

Invesco PowerShares Capital Management LLC is a registered investment adviser with its offices at 301 West Roosevelt Road, Wheaton, Illinois 60187. Invesco PowerShares Capital Management LLC serves as the investment adviser to the Trust, the PowerShares India Exchange-Traded Fund Trust, PowerShares Actively Managed Exchange-Traded Fund Trust and the PowerShares Exchange-Traded Fund Trust, a family of exchange-traded funds, with combined assets under management of more than \$13.25 billion as of February 29, 2008. The Trust is currently comprised of 29 exchange-traded funds.

On September 18, 2006, Invesco Aim Management Group, Inc., a subsidiary of Invesco Ltd., acquired Invesco PowerShares Capital Management LLC. Invesco Ltd. is an independent global investment manager. By delivering the combined power of its distinctive worldwide investment management capabilities, including AIM, Atlantic Trust, Invesco, Perpetual, PowerShares, Trimark, and WL Ross, Invesco Ltd. provides a comprehensive array of enduring investment solutions for retail, institutional and high net worth clients around the world. Operating in 20 countries, the company is listed on the New York Stock Exchange under the symbol “IVZ” and had more than \$475 billion in assets under management as of February 29, 2008.

Invesco PowerShares Capital Management LLC has overall responsibility as the Fund’s investment adviser for the selection and ongoing monitoring of the Fund’s investments, managing the Fund’s business affairs and providing certain clerical, bookkeeping and other administrative services.

The Adviser uses a team of portfolio managers, investment strategists and other investment specialists. This team approach brings together many disciplines and leverages the Adviser’s resources.

John W. Southard Jr., CFA, MBA, oversees all research, portfolio management and trading operations of the Fund. In this capacity, Mr. Southard oversees a team of portfolio managers (with Mr. Southard, the “Portfolio Managers”) who are responsible for the day-to-day management of the Fund. Peter Hubbard, who reports to Mr. Southard, is the member of the portfolio management team who is currently primarily responsible for the Fund’s day-to-day management. Mr. Hubbard receives management assistance from Jason Stoneberg, Rudolf Reitmann and Travis Trampe, who perform various functions related to portfolio management, including investing cash flows, coordinating with other team members to focus on certain asset classes, implementing investment strategy and researching and reviewing investment strategy. Each member of the

portfolio management team has appropriate limitations on his authority for risk management and compliance purposes.

Portfolio Managers

John Southard is a Managing Director at the Adviser and has been with the Adviser since its inception in February 2003. Mr. Southard has managed the Fund since inception. Prior to his current position, he was a Senior Equity Analyst at Charles Schwab & Company from May 2001 to August 2002. Prior to this, Mr. Southard was a Vice President, Portfolio Manager and Equity Analyst at First Trust Portfolios LP (formerly, Nike Securities LP) from October 1992 to May 2001.

Peter Hubbard is a Vice President of Portfolio Management of the Adviser and has been one of the Portfolio Managers primarily responsible for the day-to-day management of the Funds since their inception. Mr. Hubbard was a Research Analyst for the Adviser from May 2005 to June 2007. Mr. Hubbard has been a Portfolio Manager of the Adviser since June 2007. Prior to joining the Adviser, Mr. Hubbard was employed by Ritchie Capital, a hedge fund operator, where he was a Research Analyst and Trader from September 2003 to May 2005, after receiving a bachelor of science degree in Business and Economics from Wheaton College.

Jason Stoneberg is a Portfolio Manager of the Adviser and has been one of the Portfolio Managers primarily responsible for the day-to-day management of the Fund since its inception. Mr. Stoneberg joined the Adviser as a research analyst in January 2006, after receiving a bachelor of science degree in Business and Economics from Wheaton College. Mr. Stoneberg has been a Portfolio Manager of the Adviser since June 2007.

Rudolf Reitmann is the Vice President of Operations Management of the Adviser and has been one of the Portfolio Managers primarily responsible for the day-to-day management of the Fund since its inception. Mr. Reitmann has been the Vice President of Operations Management of the Adviser since October 2006. Prior to joining the Adviser, Mr. Reitmann worked as Assistant Vice President of ETF Services for The Bank of New York from July 1996 to September 2006.

Travis Trampe is a Portfolio Manager of the Adviser and has been one of the Portfolio Managers primarily responsible for the day-to-day management of the Fund since its inception. Mr. Trampe has been an employee of the Adviser since April 2006. Prior to joining the Adviser, Mr. Trampe was an Analyst for Principal Global Investors from December 1994 to September 2006 and Research Analyst for Quantitative Services Group LLC from October 2006 to May 2007.

The Fund's Statement of Additional Information provides additional information about the Portfolio Managers' compensation structure, other accounts managed by the Portfolio Managers and the Portfolio Managers' ownership of securities in the Trust.

The Fund pays the Adviser a unitary management fee equal to 0.75% of its average daily net assets.

Out of the unitary management fee, the Adviser pays substantially all expenses of the Fund, including the cost of transfer agency, custody, fund administration, legal, audit and other services, except for the fee payments under the Investment Advisory Agreement, distribution fees, if any, brokerage expenses, taxes, interest, litigation expenses and other extraordinary expenses.

The Adviser's unitary management fee is designed to pay the Fund's expenses and to compensate the Adviser for providing services for the Fund.

A discussion regarding the Board of Trustees' basis for approving the Fund's Investment Advisory Agreement will be available in the Semi-annual report to shareholders for the period ending April 30, 2008.

How to Buy and Sell Shares

The Shares will be issued or redeemed by the Fund at NAV per Share only in Creation Units. See "Creations, Redemptions and Transaction Fees."

Most investors will buy and sell Shares of the Fund in secondary market transactions through brokers. Shares of the Fund will be listed for trading on the secondary market on the NYSE Arca. Shares can be bought and sold throughout the trading day like other publicly traded shares. There is no minimum investment. Although Shares are generally purchased and sold in "round lots" of 100 Shares, brokerage firms typically permit investors to purchase or sell Shares in smaller "oddlots" at no per-share price differential. When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The Fund's Shares have been approved for listing on the NYSE Arca, subject to notice of issuance, under the symbol "PKN."

Share prices are reported in dollars and cents per Share.

Investors may acquire Shares directly from the Fund, and shareholders may tender their Shares for redemption directly to the Fund, only in Creation Units of

100,000 Shares, as discussed in the “Creations, Redemptions and Transaction Fees” section below.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other stocks that you hold in book entry or “street name” form.

Fund Share Trading Prices

The trading prices of Shares of the Fund on the NYSE Arca may differ from the Fund’s daily NAV and can be affected by market forces of supply and demand, economic conditions and other factors.

The NYSE Arca or other market information provider intends to disseminate the approximate value of Shares of the Fund every fifteen seconds. This approximate value should not be viewed as a “real-time” update of the NAV per Share of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value and the Fund does not make any warranty as to its accuracy.

Frequent Purchases and Redemptions of Fund Shares

The Trust’s Board of Trustees has adopted a policy of not monitoring for frequent purchases and redemptions of Fund Shares (“market timing”). In

establishing this policy, the Board evaluated the risks of market timing activities by the Trust's shareholders. The Board noted that the Fund's Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants and that the vast majority of trading in the Fund's Shares occurs on the secondary market. Because the secondary market trades do not involve the Fund directly, it is unlikely those trades would cause many of the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With respect to trades directly with the Fund, to the extent effected in-kind (i.e., for securities), those trades do not cause any of the harmful effects (as previously noted) that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, the Board noted that those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective. However, the Board noted that direct trading by Authorized Participants is critical to ensuring that the Fund's Shares trade at or close to NAV. The Fund also employs fair valuation pricing to minimize potential dilution from market timing. The Fund imposes transaction fees on in-kind purchases and redemptions of Fund Shares to cover the custodial and other costs incurred by the Fund in effecting in-kind trades, these fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that the Fund's trading costs increase in those circumstances. Given this structure, the Board determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Fund's Shares.

Creations, Redemptions and Transaction Fees

Creation Units

Investors such as market makers, large investors and institutions who wish to deal in Creation Units directly with the Fund must have entered into an authorized participant agreement with the principal underwriter and the transfer agent, or purchase through a dealer that has entered into such an agreement. Set forth below is a brief description of the procedures applicable to the purchase and redemption of Creation Units. For more detailed information, see "Creation and Redemption of Creation Unit Aggregations" in the Statement of Additional Information.

Purchase

In order to purchase Creation Units of the Fund, an investor must generally deposit a designated portfolio of equity securities constituting a substantial

replication, or a representation, of the securities included in the Fund's Underlying Index (the "Deposit Securities") and generally make a small cash payment referred to as the "Cash Component." The list of the names and the numbers of shares of the Deposit Securities is made available by the Fund's custodian through the facilities of the NSCC immediately prior to the opening of business each day of the NYSE Arca. The Cash Component represents the difference between the NAV of a Creation Unit and the market value of the Deposit Securities.

Orders must be placed in proper form by or through either (i) a "Participating Party," i.e., a broker-dealer or other participant in the Clearing Process of the Continuous Net Settlement System of the NSCC (the "Clearing Process") or (ii) a participant of DTC ("DTC Participant") that has entered into an agreement with the principal underwriter and the transfer agent, with respect to purchases and redemptions of Creation Units. All orders must be placed for one or more whole Creation Units of Shares of the Fund and must be received by the principal underwriter in proper form no later than the close of regular trading on the NYSE (ordinarily 4:00 p.m., Eastern time) ("Closing Time") in order to receive that day's closing NAV per Share. In the case of custom orders, as further described in the Statement of Additional Information, the order must be received by the principal underwriter no later than 3:00 p.m., Eastern time. A custom order may be placed by an Authorized Participant in the event that the Trust permits or requires the substitution of an amount of cash to be added to the Cash Component to replace any Deposit Security which may not be available in sufficient quantity for delivery or which may not be eligible for trading by such Authorized Participant or the investor for which it is acting or any other relevant reason. See "Creation and Redemption of Creation Unit Aggregations" in the Statement of Additional Information.

A fixed Creation Transaction Fee of \$750 is applicable to each transaction regardless of the number of Creation Units purchased in the transaction.

An additional charge of up to four times the Creation Transaction Fee may be imposed with respect to transactions effected outside of the Clearing Process (through a DTC Participant), if any, or to the extent that cash is used in lieu of securities to purchase Creation Units. See "Creation and Redemption of Creation Unit Aggregations" in the Statement of Additional Information. The price for each Creation Unit will equal the daily NAV per Share times the number of Shares in a Creation Unit plus the fees described above and, if applicable, any transfer taxes.

Shares of the Fund may be issued in advance of receipt of all Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Fund cash at least equal to 115% of the market value of the missing Deposit Securities. See “Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information.

Legal Restrictions on Transactions in Certain Securities

An investor subject to a legal restriction with respect to a particular security required to be deposited in connection with the purchase of a Creation Unit may, at the Fund’s discretion, be permitted to deposit an equivalent amount of cash in substitution for any security which would otherwise be included in the Deposit Securities applicable to the purchase of a Creation Unit. For more details, see “Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information.

Redemption

The Fund’s custodian makes available immediately prior to the opening of business each day on the NYSE Arca, through the facilities of the NSCC, the list of the names and the numbers of shares of the Fund’s portfolio securities that will be applicable that day to redemption requests in proper form (“Fund Securities”). Fund Securities received on redemption may not be identical to Deposit Securities which are applicable to purchases of Creation Units. Unless cash redemptions are available or specified for the Fund, the redemption proceeds consist of the Fund Securities, plus cash in an amount equal to the difference between the NAV of the Shares being redeemed, as next determined after receipt by the transfer agent of a redemption request in proper form, and the value of the Fund Securities (the “Cash Redemption Amount”), less the applicable redemption fee and, if applicable, any transfer taxes. Should the Fund Securities have a value greater than the NAV of Shares being redeemed, a compensating cash payment to the Trust equal to the differential, plus the applicable redemption fee and, if applicable, any transfer taxes will be required to be arranged for by or on behalf of the redeeming shareholder. For more details, see “Creation and Redemption of Creation Unit Aggregations” in the Statement of Additional Information.

An order to redeem Creation Units of the Fund may only be effected by or through an Authorized Participant. An order to redeem must be placed for one or more whole Creation Units and must be received by the transfer agent in proper form no later than the close of regular trading on the NYSE (ordinarily

4:00 p.m., Eastern time) in order to receive that day's closing NAV per Share. In the case of custom orders, as further described in the Statement of Additional Information, the order must be received by the transfer agent no later than 3:00 p.m., Eastern time.

A fixed Redemption Transaction Fee of \$750 is applicable to each redemption transaction regardless of the number of Creation Units redeemed in the transaction.

An additional charge of up to four times the Redemption Transaction Fee may be charged to approximate additional expenses incurred by the Trust with respect to redemptions effected outside of the Clearing Process, if any, or to the extent that redemptions are for cash. The Fund reserves the right to effect redemptions in cash. A shareholder may request a cash redemption in lieu of securities, however, the Fund may, in its discretion, reject any such request. See "Creation and Redemption of Creation Unit Aggregations" in the Statement of Additional Information.

Dividends, Distributions and Taxes

Ordinarily, dividends from net investment income, if any, are declared and paid quarterly. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Taxes

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an IRA plan, you need to be aware of the possible tax consequences when:

- Your Fund makes distributions,
- You sell your Shares listed on the NYSE Arca, and
- You purchase or redeem Creation Units.

Taxes on Distributions

Ordinarily, dividends from net investment income, if any, are declared and paid quarterly. The Fund may also pay a special distribution at the end of the calendar year to comply with federal tax requirements. In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund. Dividends paid out of the Fund's income and net short-term gains, if any, are taxable as ordinary income. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Long-term capital gains of non-corporate taxpayers are generally taxed at a maximum rate of 15% for taxable years beginning before January 1, 2011. In addition, for these taxable years, some ordinary dividends declared and paid by the Fund to non-corporate shareholders may qualify for taxation at the lower reduced tax rates applicable to long-term capital gains, provided that holding period and other requirements are met by the Fund and the shareholder. Without future congressional action, the maximum rate of long-term capital gains will return to 20% in 2011, and all dividends will be taxed at ordinary income rates.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares, and as capital gain thereafter. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Fund must withhold a percentage of your distributions and proceeds if you have not provided a taxpayer identification number or social security number.

Taxes on Exchange-Listed Share Sales

Currently, any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses may be limited.

Taxes on Purchase and Redemption of Creation Units

An AP who exchanges equity securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the exchanger's

aggregate basis in the securities surrendered and the Cash Component paid. A person who exchanges Creation Units for equity securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the aggregate market value of the securities received and the Cash Redemption Amount. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Under current federal tax laws, any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price.

Foreign Income Taxes

The Fund intends to elect to pass its credits for foreign income taxes through to its shareholders for a taxable year if more than 50% of its assets at the close of the year, by value, consists of stock and securities of foreign corporations. If the Fund makes this election, each shareholder will be treated as having paid a proportionate share of the Fund's foreign income taxes, but the shareholder must include an equal amount in gross income.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You may also be subject to state and local tax on Fund distributions and sales of Fund Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Fund Shares under all applicable tax laws. For more information, please see the Statement of Additional Information section "Taxes."

Distributor

Invesco Aim Distributors, Inc. (the "Distributor") serves as the distributor of Creation Units for the Fund on an agency basis. The Distributor does not maintain a secondary market in Shares.

Net Asset Value

The Bank of New York (“BONY”) calculates the Fund’s NAV at the close of regular trading (normally 4:00 p.m. Eastern time) every day the NYSE is open. NAV is calculated by deducting all of the Fund’s liabilities from the total value of its assets and dividing the result by the number of Shares outstanding, rounding to the nearest cent. All valuations are subject to review by the Trust’s Board of Trustees or its delegate.

In determining NAV, expenses are accrued and applied daily and securities and other assets for which market quotations are available are valued at market value. Stocks and other equity securities are valued at the last sales price that day based on the official closing price of the exchange where the security is primarily traded. The NAV for the Fund will be calculated and disseminated daily.

The NYSE Arca will disseminate every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association the approximate value of Shares of the Fund, an amount representing on a per share basis the sum of the current value of the Deposit Securities based on their then current market price and the estimated Cash Component. As the respective international local markets close, the market value of the Deposit Securities will continue to be updated for foreign exchange rates for the remainder of the U.S. trading day at the prescribed 15 second interval. The value of the Underlying Index will be calculated and disseminated intra day by the Index Provider.

The value of the Fund’s portfolio securities is based on the securities’ closing price on local markets when available. If a security’s market price is not readily available or does not otherwise accurately reflect the fair value of the security, the security will be valued by another method that the Adviser believes will better reflect fair value in accordance with the Trust’s valuation policies and procedures approved by the Board of Trustees. Money market securities maturing in 60 days or less will be valued at amortized cost. The Fund may use fair value pricing in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund’s portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded (such as a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund’s NAV and the prices used by the Fund’s Underlying Index. This may adversely affect the Fund’s ability to track its Underlying Index. With

respect to securities that are primarily listed on foreign exchanges, the value of the Fund's portfolio securities may change on days when you will not be able to purchase or sell your Shares.

Fund Service Providers

BONY, 101 Barclay Street, New York, New York 10286, is the administrator, custodian and fund accounting and transfer agent for the Fund. Clifford Chance US LLP, 31 West 52nd Street, New York, NY 10019, serves as legal counsel to the Fund.

PricewaterhouseCoopers LLP, 300 Madison Avenue, New York, NY 10017, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

Index Provider

The WNA Nuclear Energy IndexSM is calculated and maintained by Standard & Poor's Custom Indices ("S&P") on behalf of WNA Global Indexes, LLC ("WNA"). Neither S&P nor WNA is affiliated with the Trust, the Adviser or the Distributor. The Adviser has entered into a license agreement with WNA to use the WNA Nuclear Energy IndexSM. The Fund is entitled to use the WNA Nuclear Energy IndexSM pursuant to a sub-licensing agreement with the Adviser.

Disclaimers

Without limiting any of the foregoing, in no event shall the Adviser have any liability for any special, punitive, direct, indirect or consequential damages (including lost profits) arising out of matters relating to the use of the Underlying Index even if notified of the possibility of such damages.

Other Information

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares of the Fund. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Trust.

Continuous Offering

The method by which Creation Unit Aggregations of Fund Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Unit Aggregations of Shares are issued and sold by the Fund on an ongoing basis, a “distribution,” as such term is used in the Securities Act of 1933, as amended (the “Securities Act”), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Unit Aggregations after placing an order with the Distributor, breaks them down into constituent Shares and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a Prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with the Shares that are part of an over-allotment within the meaning of Section 4(3)(a) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. The Trust, however, has received from the SEC an exemption from the prospectus delivery obligation in ordinary secondary market transactions under certain circumstances, on the condition that purchasers are provided with a product description of the Shares. Firms that incur a prospectus delivery obligation with respect to Shares are reminded that, under the Securities Act Rule 153, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the NYSE Arca is satisfied by the fact that the prospectus is available at the NYSE Arca upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

For More Information

For more detailed information on the Trust, the Fund and the Shares, you may request a copy of the Fund's Statement of Additional Information. The Statement of Additional Information provides detailed information about the Fund, and is incorporated by reference into this Prospectus. This means that the Statement of Additional Information, for legal purposes, is a part of this Prospectus.
