Fund Description

The PowerShares Dynamic Large Cap Growth Portfolio is based on the Dynamic Large Cap Growth IntellidexSM, which seeks to provide capital appreciation while maintaining consistent and accurate style exposure. The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index.

The Style Intellidexes apply a rigorous 10-factor style-isolation process to objectively segregate companies into their appropriate investment style and size universe. Each company is thoroughly evaluated to determine its investment merit by analyzing numerous unique financial characteristics from four broad financial perspectives: fundamental, valuation, timeliness and risk.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. Concentrated market-cap investments involve greater risks than more diversified investments.

Performance data quoted represents past performance. As stated in the Fund's prospectus, the total expense ratio is 0.64%. However, the Adviser has contractually agreed to waive fees and/or pay certain Fund expenses which resulted in a net expense ratio of 0.63%. These waivers and reimbursement contracts extend through at least Aug. 31, 2012. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. The Shares' performance reflects fee waivers, absent which performance would have been lower. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.
