Fund Description

The PowerShares Lux Nanotech Portfolio is based on the Lux Nanotech Index™. The Fund will normally invest at least 90% of its total assets in common stocks that comprise the Index. The Index seeks to identify a group of companies involved in developing, manufacturing and funding nanotechnology applications. Companies may be involved in one or more stages of Lux's Nanotechnology Value Chain framework: Nanomaterials, Nanointermediates, Nano-enabled Products and Nanotools. The modified market-cap portfolio is rebalanced and reconstituted quarterly.

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. Concentrated industry investments involve greater risks than more diversified investments.

Fund Performance & Index History (%)¹

	1 Year	3 Year	5 Year	10 Year	Fund Inception ²
Underlying Index					
Lux Nanotech	40.65	-15.93	-	-	-9.02
Benchmark Index					
S&P 500	26.47	-5.62	-	-	0.25
Fund					
NAV	38.64	-15.68	-	-	-8.49
After Tax Held	38.53	-15.70	-	-	-8.54
After Tax Sold	25.10	-12.96	-	-	-7.08
Market Price	38.82	-15.68	-	-	-8.50

Performance data quoted represents past performance. As stated in the Fund's prospectus, the gross annual fund operating expense ratio is 0.89%. However, the Adviser has contractually agreed to waive fees and/or pay certain Fund expenses which resulted in a lower fee actually paid by investors. These waivers and reimbursement contracts are reviewed by the Board annually and extend through at least Aug. 30, 2010. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. The Shares' performance reflects fee waivers, absent which performance would have been lower. See invescopowershares.com to find the most recent month-end performance numbers. After Tax Held represents total return after taxes on distributions and assumes Shares have not been sold. After Tax Sold represents total return after taxes on distributions and the sale of Fund Shares. After-tax returns reflect the highest federal income tax rate but exclude state and local taxes. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

3-Year Index Statistics^{1,3}

	Performance (%)	Volatility (%)	Sharpe Ratio
Lux Nanotech	-15.93	29.50	-0.61
S&P 500	-5.62	19.89	-0.38

Fund Inception: Oct. 26, 2005

¹ Index returns do not represent Fund returns. An investor cannot invest directly in an index.

² Returns for the benchmark indexes are based on the closest month end to the Fund's inception date. Fund performance figures include the reinvestment of dividends, but the return figures for the respective underlying Index do not. As a result, Fund performance returns may appear to be more favorable when compared to the underlying Index's returns.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors

might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

The S&P 500® Index is an unmanaged index considered representative of the U.S. stock market.

Shares are not FDIC insured, may lose value and have no bank guarantee.

Shares are not individually redeemable and owners of the Shares may acquire those Shares from the Fund and tender those Shares for redemption to the Fund in Creation Unit aggregations only, typically consisting of 50,000 Shares.

Leading the Intelligent ETF Revolution[®]

Underlying Index performance does not represent Fund performance.

³ The Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Volatility is the annualized standard deviation of monthly index returns.

Beta is a measure of relative risk and the slope of regression.

Sharpe Ratio is a risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk. A higher Sharpe Ratio indicates better risk-adjusted performance.

Correlation indicates the degree to which two investments have historically moved in the same direction and magnitude.

Alpha is a measure of performance on a risk-adjusted basis.

Stock Price-to-Earnings Ratio is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Stock Price-to-Book-Value Ratio is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average is a method of calculating an average value that lessens the impact of large outliers and increases the impact of small ones.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities' market value.

⁴ Please see the website for complete holdings information. Holdings are subject to change.

⁵ The weighted costs excluded from the expense cap include: legal fees pertaining to the Fund's shares offered for sale, SEC and state registration fees, initial fees paid to be listed on an exchange and sublicensing fees. The expense cap is not representative of the total expenses the investor may pay. Please refer to the prospectus for a complete fee schedule.

Shares are subject to risks including: Small and Medium-Sized Company Risk – investing in securities of small and medium-sized companies involves greater risk than is customarily associated with investing in more established companies.

The Fund is concentrated in a single industry, which involves substantially greater risk of loss and price fluctuations than an investment diversified across multiple industries or sector segments.
